ADVISORY BOARD FIELD TRIP TO HULTMAN AQUEDUCT

More than 50 people visited the MWRA water facilities on August 26 on the Advisory Board's Annual Field Trip.

Members/guests had the opportunity to visit Echo Bridge, Shaft 5A and the Hultman Aqueduct construction site. (See photo.) The tour also visited the Norumbega Reservoir.

As the field trip attendees were leaving Shaft 5A, a small leak was discovered approximately 220 feet from the break that occurred in May.

Adv Brd members walk through a section of the Hultman Aqueduct..

MWRA has measured the leakage at approximately two gallons per minute. The goal is to repair the leak under pressure, a "wet" repair. Currently the Authority is evaluating four options and expects to repair the leak without any disruption of service.

Adv Brd members and guests at the Sudbury Reservoir Dam.
